# Water Management and Agriculture Workshop

---

## Results of the Stakeholders' Survey Analysis

Oana Islam, Marian Dragoi  
CESEP

Bucharest, 5 – 6 November 2012

# Background

---

EU Grant component

“ the organization of a stakeholders' dialogue on inter-linkages between WFD and EU agricultural policies”.

# Objectives

---

The main objectives of the survey are:

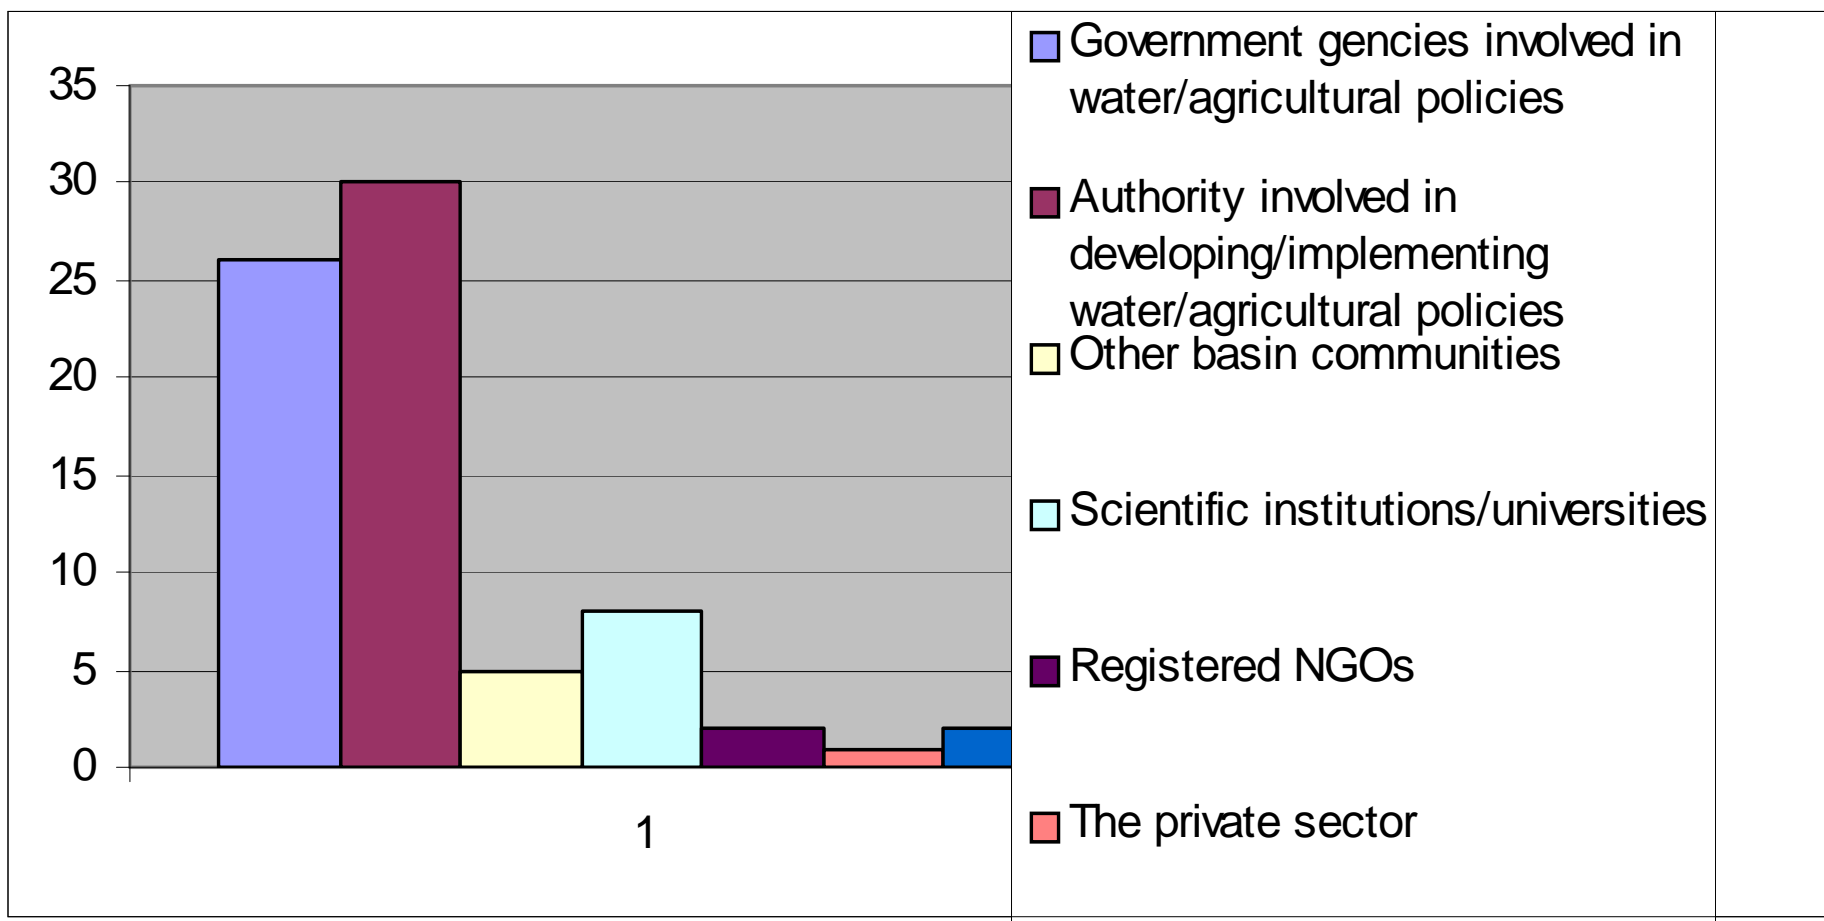

- to learn from stakeholder experience, expertise and best practices
- to identify the needs and potential barriers for further capacity building and implementation process for agricultural measures
- to further support the countries efforts in implementing the EU and national legislation and achieve the WFD objectives.

# Target audience

---

The survey is addressing stakeholders in the Danube countries **who are involved or directly responsible for aspects of integration of agricultural and water policies initiatives and efforts** within the context of the implementation of Nitrates Directive (ND) and Common Agricultural Policy (CAP), and the Water Framework Directive (WFD).

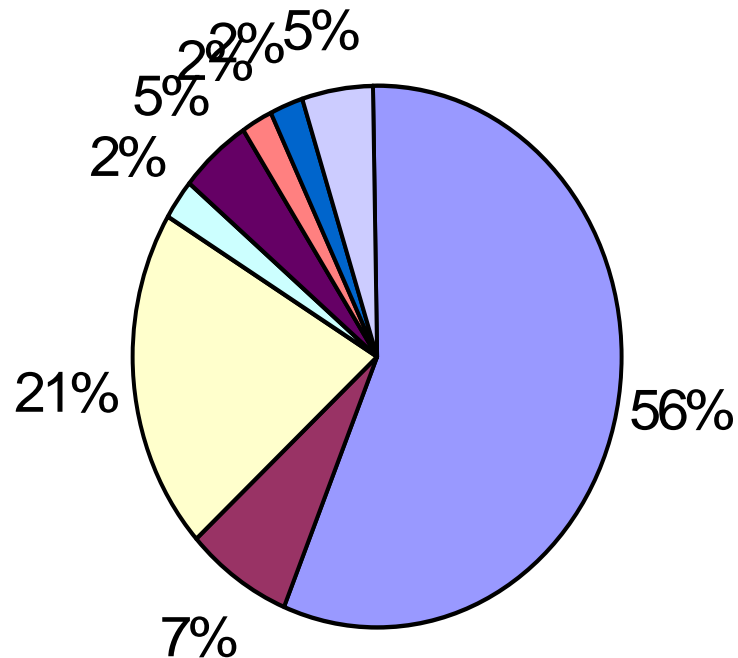

# The stakeholder's structure according to their representation

Land management and urban planning

# Scope (interest) of stakeholders involvement

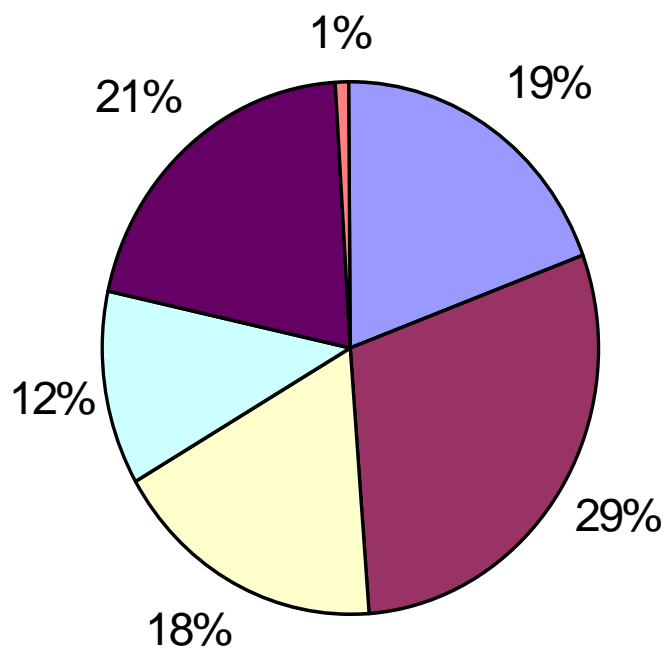

# Reasons why getting the stakeholders involved

- to support the acceptance of EU directives
- to assure that as many different stakeholder are addressed
- to increase innovative, useful and efficient outcome
- to build broad – based support for negotiations
- to facilitate implementation of the decision

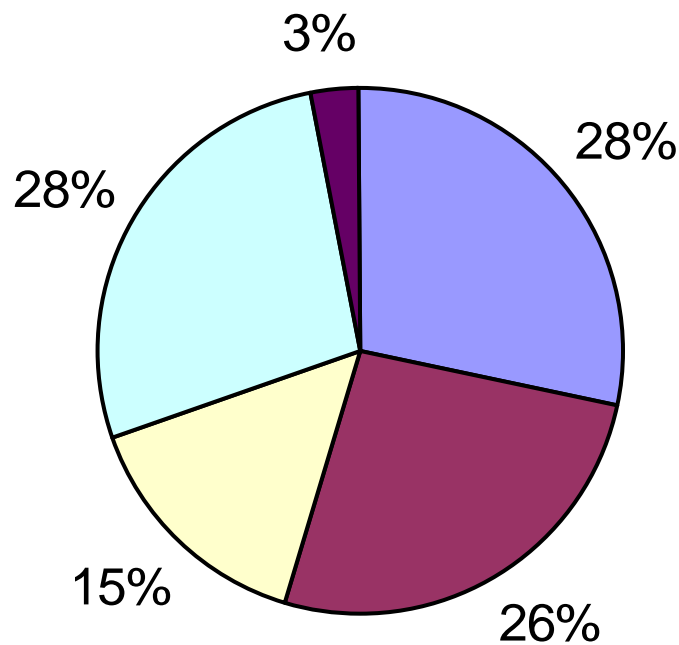

# Benefits reached through stakeholder involvement

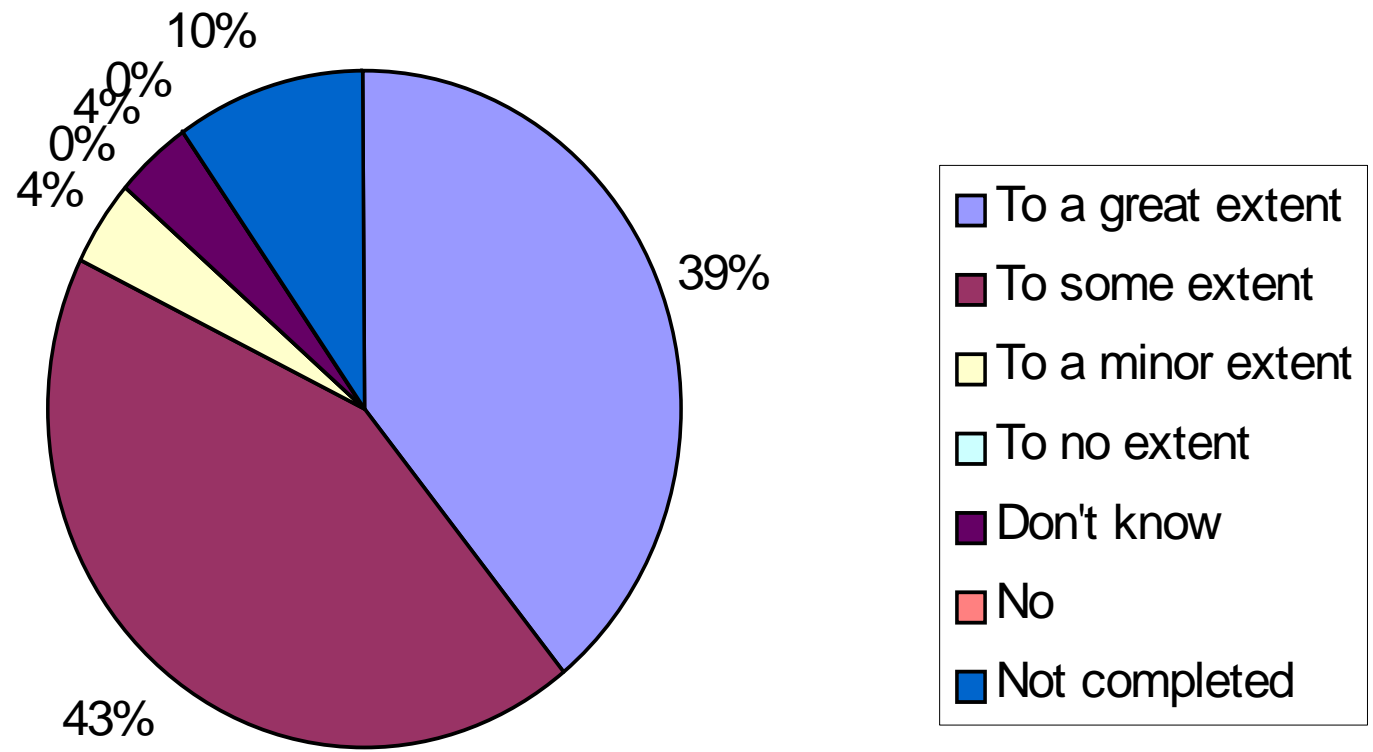

- Harmonized objectives of individual groups
- Better understanding for the public issues
- Remove potential conflicts between stakeholder
- Resilience in communities/farms through cooperation
- Sustainability of agricultural measures

# Actions required for the implementation of agri-environmental measures

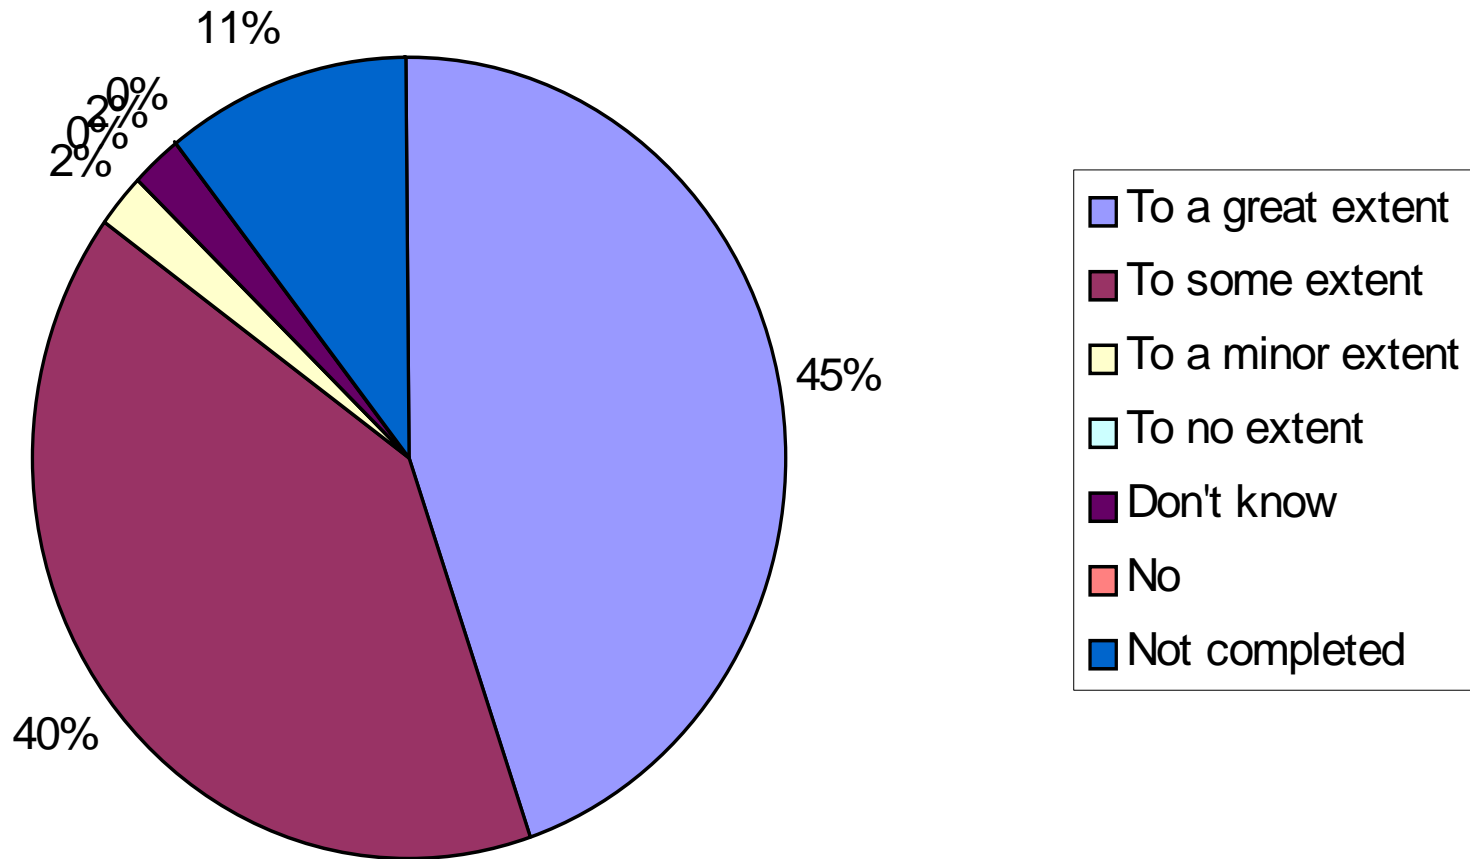

- Farm advisory services
- Communication
- Citizen involvement
- Information on the effectiveness of measures
- Other

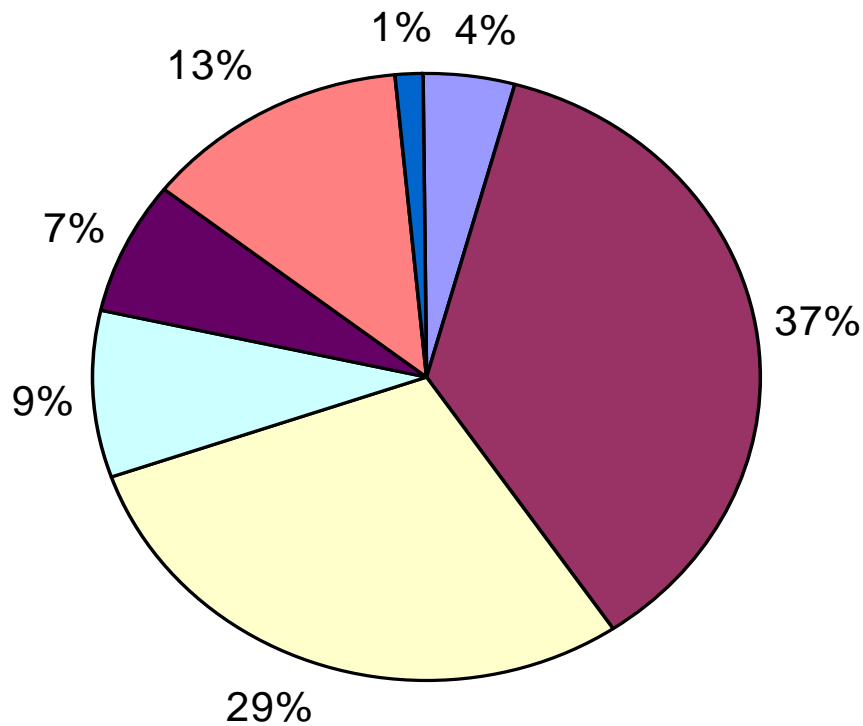

# To which extent the implementation of ND and CAP addresses agricultural impacts on water?

# To which extent the WFD objectives are affected by agricultural practices?

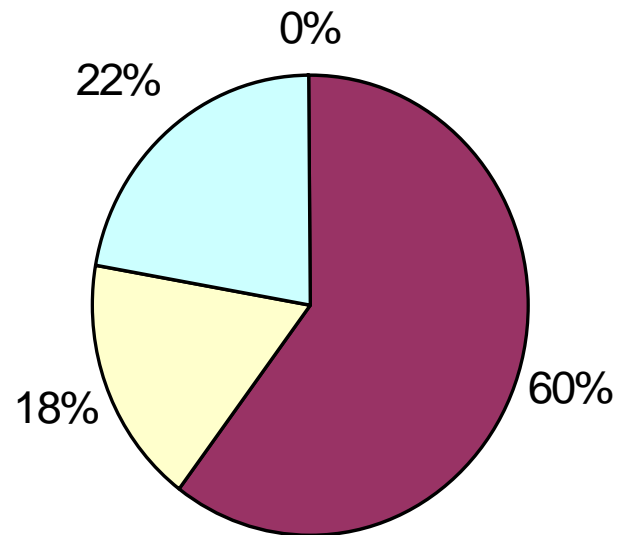

# The barriers identified in considering the WFD - CAP interlinkages

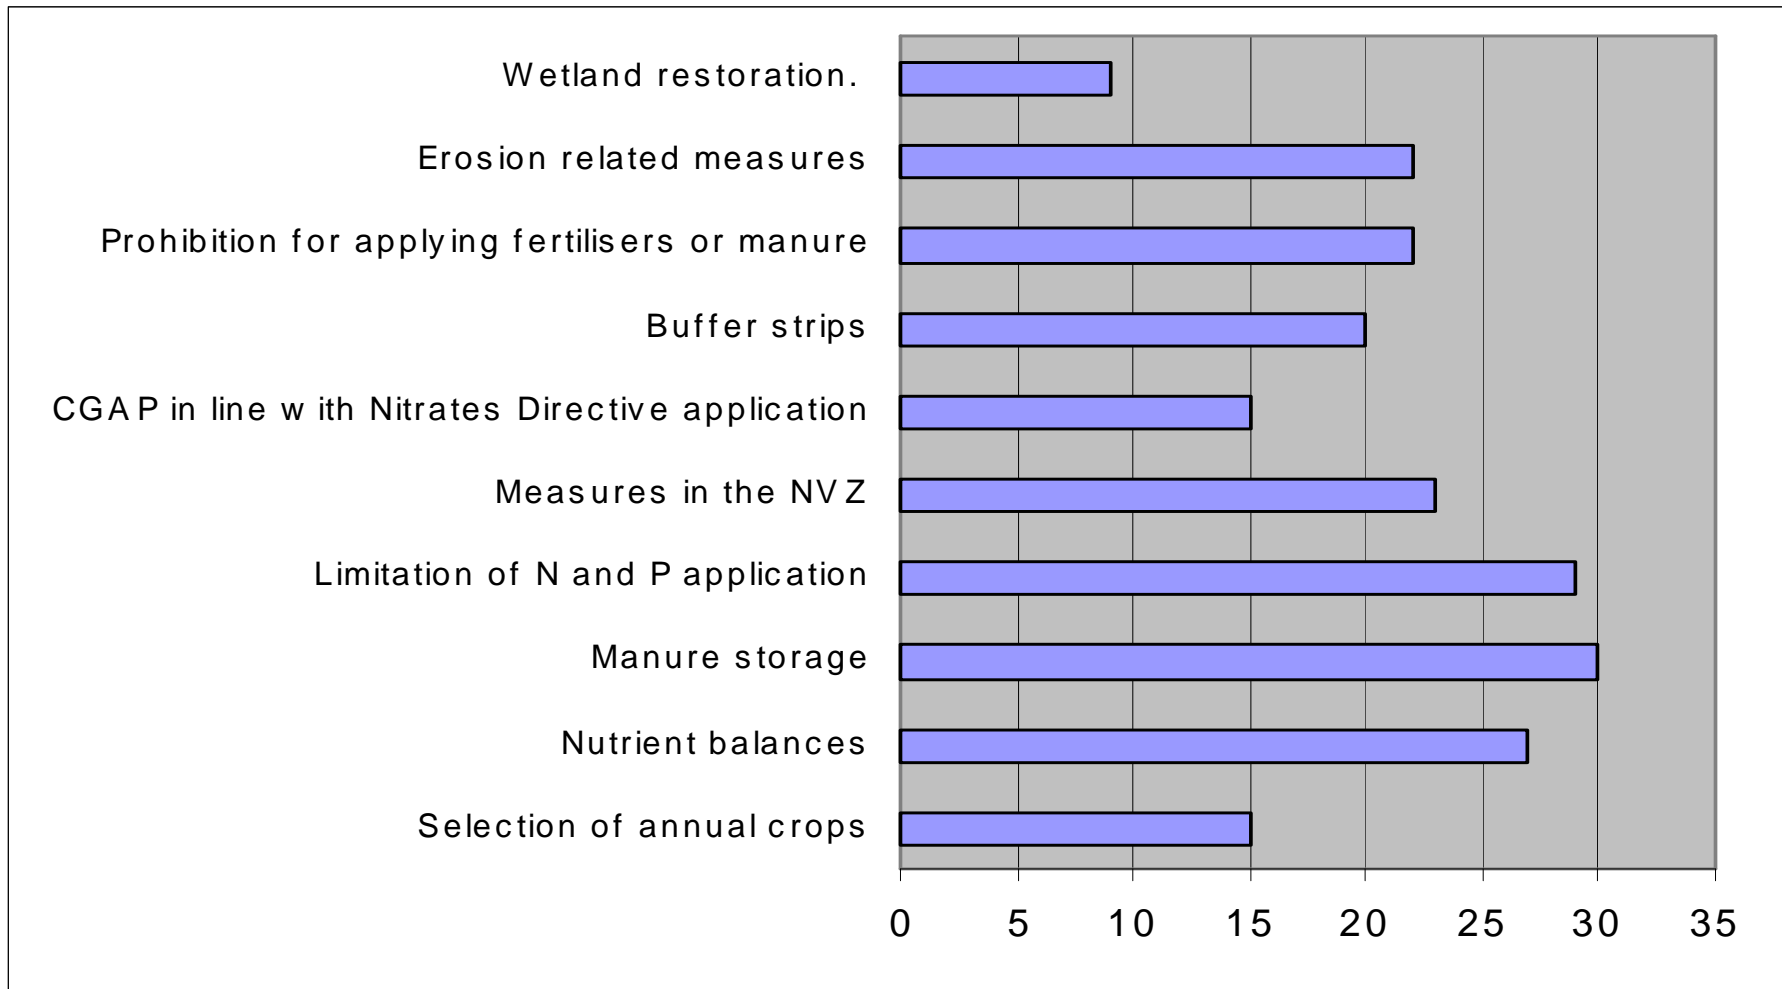

- Absence of supporting legislation;
- Limited knowledge on the benefits of agri-environmental measures
- No clear responsibility for WFD CAP interlinkages;
- Absence of relevant mechanisms (such as inter-ministerial committees)
- No barriers in my country/region;
- Don't know.
- Other

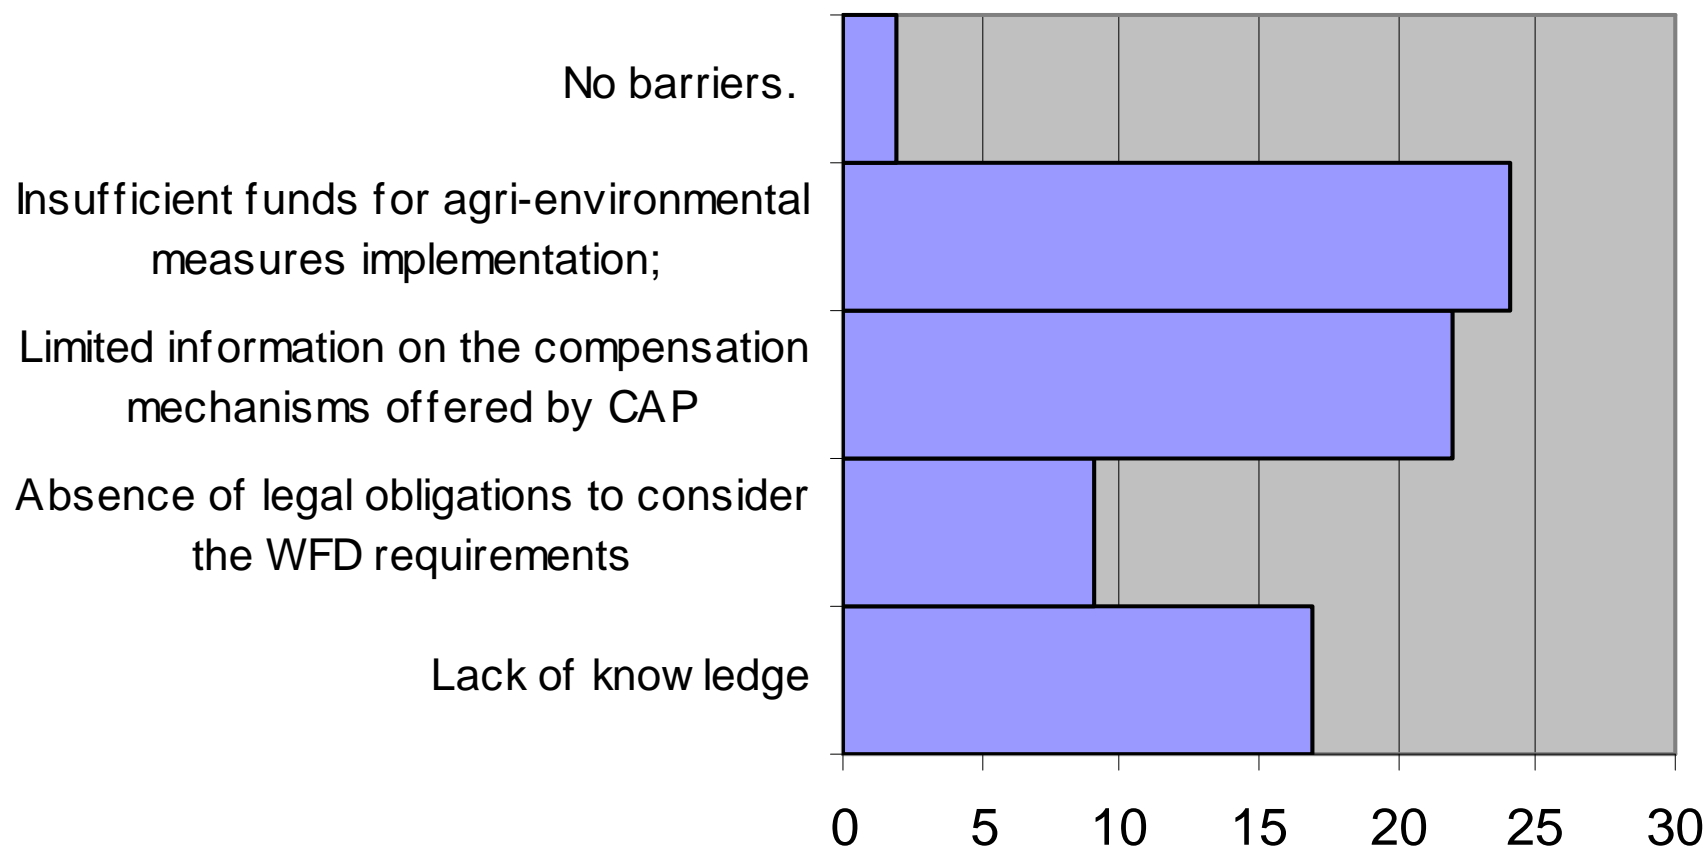

# Do farm advisory services currently consider WFD – agriculture interlinkages in their activities?

# Where the most of the farm practical management advice is targeted?

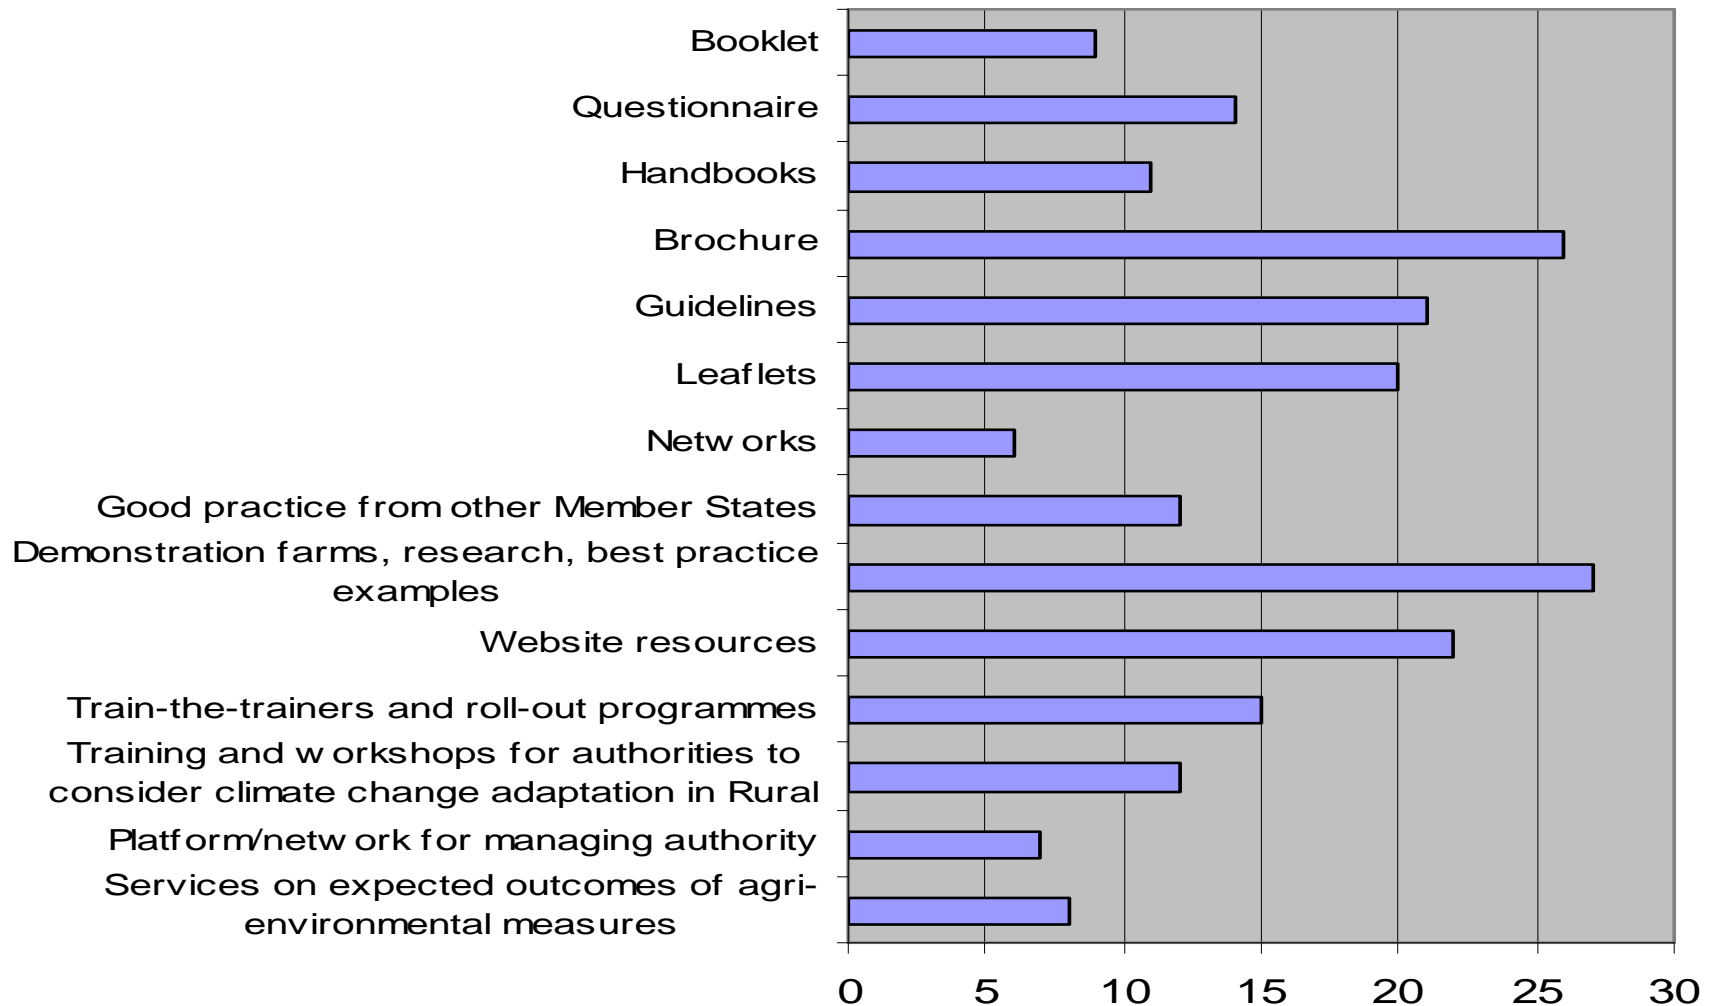

# Barriers to a more effective system of farm advisory services

# Most suitable products used for public and stakeholders consultation

---

# Thank you!
